Abstract -----	1
Introduction -----	2
Purpose and scope of the investigation -----	2
Location of the area -----	2
Previous investigations -----	3
History of the investigation -----	3
Acknowledgments -----	4
Well-location symbols -----	4
Geography -----	5
Topography and drainage -----	5
Climate -----	6
Precipitation -----	6
Temperature -----	6
Evaporation -----	10
Culture and industry -----	10
Vegetation -----	10
Geology -----	11
General features -----	11
Consolidated rocks -----	11
Eocene continental and marine sedimentary rocks -----	11
Eocene volcanic rocks -----	12
Puget group -----	12
Keechelus andesitic series -----	12
Oligocene and Miocene marine sedimentary rocks -----	12
Structure -----	13
Unconsolidated rocks -----	14
Older unconsolidated deposits -----	15
Lower clay unit -----	16
Unnamed gravel -----	16
Upper clay unit -----	17
Unnamed sand -----	17
Vashon drift -----	18
Advance stratified drift -----	19
Till -----	19
Recessional stratified drift -----	21
Post-Vashon deposits -----	21
Geologic history -----	22
Pre-Quaternary history -----	23
Quaternary history -----	23

# CONTENTS

Geology (continued)	
Geologic history (continued)	
Quaternary history (continued)	
Interglacial erosional interval -----	24
Advance and maximum of the Vashon glacier -----	24
Wasting of the Vashon glacier -----	25
Post-Vashon geologic history -----	25
Manmade alterations -----	26
Summary of the geologic history -----	26
Ground water -----	27
Water in consolidated rocks -----	27
Water in unconsolidated deposits -----	28
Lower clay unit -----	29
Unnamed gravel -----	29
Upper clay unit -----	30
Unnamed sand -----	30
Vashon drift -----	31
Advance stratified drift -----	31
Till -----	31
Recessional stratified drift -----	31
Post-Vashon deposits -----	33
Water in the Drift Plains -----	33
West Seattle Drift Plain -----	34
Seattle Drift Plain -----	34
Interlake drift plain -----	35
Eastern drift plain -----	36
Water in the major valleys -----	37
Duwamish River valley -----	40
Sammamish River valley -----	40
Snoqualmie River valley -----	40
Water on Mercer Island -----	41
Water in the Newcastle-Grand Ridge hills -----	42
Use of ground water -----	42
Domestic supplies -----	42
Public supplies -----	42
Industrial supplies -----	46
Irrigation supplies -----	46
Fluctuation of water levels -----	46
Quality of water -----	51
Expression of results -----	51
Geochemistry of ground water -----	52
Relation of water quality to use -----	52
Water of inferior quality -----	55

## CONTENTS

	Page
Ground water (continued)	
Future development of ground-water supplies -----	56
References cited -----	56
Tabulated well data -----	59

## ILLUSTRATIONS

---

(Plates 1-3 in pocket)

Plate 1.	Generalized geologic map of northwestern King County, Washington.	
2.	Geologic sections of northwestern King County, Washington.	
3.	Map showing locations of representative wells and springs, northwestern King County, Washington.	
Figure 1.	Map of northwestern King County showing principal topographic units -----	7
2.	Monthly precipitation at Seattle for the period of record, 1905-56, and average evaporation for the period 1941-53 -----	8
3.	Map of King County showing location of weather stations and the average annual precipitation -----	9
4.	Laminated clay of the Vashon drift, overlain by recessional stratified drift exposed along the south side of U.S. Highway 10, about 1 mile east of Issaquah -----	20
5.	Vashon recessional stratified drift in a gravel pit about 1 mile north of Issaquah -----	20
6.	Hydrographs showing fluctuations of water levels in observation wells -----	38
7.	Hydrographs showing fluctuations of water levels in observation wells -----	39
8.	Hydrograph showing fluctuations of water levels in well 24/5-23E1, monthly cumulative departure from normal precipitation, and monthly precipitation at Federal Office Building, Seattle -----	47
9.	Effect of barometric pressure and tidal fluctuation on water level in well 24/4-19H1, October 10-17, 1954	50

# TABLES

---

	Page
Table 1. Selected wells that tap only Vashon stratified drift -----	32
2. Use of ground water for public supply-----	43
3. Use of ground water for industrial supply-----	48
4. Use of ground water supplies for irrigation -----	49
5. Records of representative wells in northwest King County -	60
6. Records of selected springs in northwest King County ----	113
7. Drillers' logs of wells in northwest King County -----	116
8. Selected comprehensive chemical analyses of ground water in northwest King County -----	236
9. Selected partial chemical analyses of ground water in northwest King County -----	238
